

## FirstCare Closely Monitoring Ebola in Texas

*Sunday, October 5, 2014*

With the arrival of Ebola to the Dallas area, FirstCare wants to remind our providers where to go for the most current information and direction from the Centers for Disease Control and Prevention (CDC), Health and Human Services (HHS), and the Texas Department of Health.

Key information can be found at [CDC Guidance on Ebola](#) and the [CDC Health Advisory](#). Among other important information these links contain CDC recommendations for health care personnel and health officials who are evaluating patients for possible Ebola virus disease.
